

JT 0060

## DATA SHEET

The Wheel Spacer has been designed as a strong and lightweight reinforcement spacer for vertical precast concrete. Locking hub keeps wheels in place during placement of steel or pouring of concrete and provides minimal contact with formwork. Designed to allow unimpeded concrete flow through the spokes with small contact members, to assure minimal contact to the formwork and assure a maximum load capacity.

WHEEL SPACER

Product Code	Cover (mm)	Steel Bar (mm)	Packing (nos)
JWS20	20	6-18	1500
JWS25	25	6-18	1000
JWS30	30	6-18	750
JWS40	40	6-18	600
JWS50	50	6-18	300
