## DATA SHEET

Four-legged spacer or commonly known as Tower Spacer are modified chair spacers made of plastic used in precast and on-site concrete applications. These are a highly stable plastic spacer to prevent the spacer from overturning. These spacers are tough and are designed for both vertical and horizontal reinforcement. Also helps to avoid the excessive use of metal binding wires.

**FOUR-LEGGED SPACER**

Product code	Concrete cover	For Steel Dia
JFLS20	20 mm	6-20 mm
JFLS30	30 mm	6-20 mm
JFLS40	40 mm	6-20 mm
JFLS50	50 mm	6-20 mm
JFLS60	60 mm	6-20 mm
